Edward Ijeruh

Frontend Web Developer

⚲ Ibadan, Oyo, Nigeria | ✉ ijeruh20@gmail.com | 🔗 Portfolio: edwardijeruh.netlify.app

---

Professional Experience

Frontend Developer
LanderCraft Technologies - Remote

📅 May 2025 – November 2025

- Developed responsive, modern web interfaces using React, HTML, CSS, and JavaScript, ensuring optimal performance and mobile-first design.
- Enhanced accessibility and responsiveness by integrating UX design principles and adhering to WCAG standards.
- Diagnosed and resolved frontend issues, including layout inconsistencies, rendering errors, and performance bottlenecks.
- Collaborated effectively using Git workflows, pull requests, and regular code reviews to streamline development.

Frontend Developer Intern
Cinfores Limited - Rivers, Nigeria

📅 Jul 2021 – Sept 2022

- Assisted in developing scalable, cross-browser websites with a focus on responsive design and performance optimization.
- Engaged in rigorous functional testing and debugging to elevate web performance and user experience.
- Supported senior developers by integrating intuitive UI components and refining layout structures to enhance usability.

Business Applications Contributor
Ibadan Electricity Distribution Company - Oyo, Nigeria

📅 Jan 2024 – Oct 2024

- Collaborated in the development, deployment, and maintenance of internal business software.
- Contributed to improving operational efficiency through UI enhancements and user feedback implementation.
- Documented frontend changes and assisted backend teams with API integration support.

Education

B.Sc. Computer Science
Afe Babalola University, Ado Ekiti

📅 Sept 2019 - Oct 2023

- Graduated with Second Class Upper Division.

- Built foundational knowledge in software development, algorithms, and systems design.

Projects

1. TasteHaven - Fast Food Ordering Website
   Stack: React, Tailwind CSS, Firebase

- Designed and developed a multi-page fast food ordering platform with a clean, mobile-first UI.

- Implements features including product browsing, category filtering, cart functionality, and checkout.

- Integrates Firebase for real-time database, order persistence, and user authentication.

- Built dynamic menu and order flows using reusable components, route-based navigation, and protected pages.

2. EchoMind - Blog & Writing Platform
   Stack: Next.js, TypeScript, Tailwind CSS, Firebase, Cloudinary

- Building a clean, accessible blog site were users can share content focused on frontend development, career insights, life in general.

- Implements Firebase for real-time database and user authentication and Cloudinary for media interaction

- Designed with a content-first layout and SEO optimization
